

LARGEО Group of Companies has participated in the *75th Conference and Exhibition EAGE and SPE EUROPEC 2013*. The event was held from 10 to 13 June in London (UK), where were the newest developments in the field of geophysics, geology, and engineering sciences.

On the conference LARGEО Group of Companies presented poster entitled: «*Delineation of Deep Water Depositional System Elements Using AVO Attributes Analysis and Spectral Decomposition*».

Also, member of the

LARGEО Group of Companies

made ??everyday presentation on the ION-GXT booth (

LARGEО and ION-GXT

have the strategic alliance) entitled as: «Application of the modern ION-GXT

technology for imaging in the areas with the complex geology». The presentation showed LARGEО's experience and technical capabilities of the ION-GXT's software.

We are grateful to our partners, colleagues and all those, who were interest in LARGEО Group of Companies and visited our booth and presentations.

Special thanks to those who came to our evening on the boat "Barracuda" and made ??the trip down the Thames River.

We were pleased to meet You!
